AuThink aids parents
Continue sequence

The objective of this test is to recognize through three tasks which items continue a given sequence of items. This exercise helps improve children's logical reasoning.

**TASKS (5)**

1. **Continue sequence, Difficulty 5**
   In this task, the objective is to recognize which item continues the sequence of two items. The task can be solved by clicking on the correct item in the vertical list.

2. **Continue sequence, Difficulty 5**
   In this task, the objective is to recognize which item continues the sequence of three items. The task can be solved by clicking on the correct item in the vertical list.

3. **Continue sequence, Difficulty 4**
   In this task, the objective is to recognize which item continues the sequence of four items. The task can be solved by clicking on the correct item in the vertical list.
