The new College of Engineering and Computer Science on Florida Atlantic University Boca Raton Campus is being designed to be the first Platinum LEED (Leadership in Environmental and Engineering Design) building in the State of Florida. Designed as a five story 119,835 sf facility, the building will house state of the art teaching and research labs, classrooms, offices and a environmentally conscious dining facility. This project is the First Phase of an ultimate build out of 250,000 sf.
